

AT 810/810D DIGITAL LCR METER

CONTINUOUS TESTING FREQUENCY 100Hz、120Hz、1kHz、10kHz

- Measurement parameters L-Q,C-D,R-Q,Z-Q
- Monitoring parameters D,Q
- Automatic 6-range testing

The AT810 is a general-purpose LCR digital bridge that uses high-performance microprocessors to control micro desktop instruments. Automatic measurement of inductance L, capacitance C, resistance R, complex impedance Z, quality factor Q, loss tangent D, phase angle θ (Degrees) and Phase θ (Radians). This instrument can meet the requirements of various component manufacturers, schools, research institutes, and metrology and quality inspection departments for precise testing and mass production.

The instrument has professional sorting

■ Power Voltage: 198V-250VAC Frequency: 50Hz Max power: 20VA

function and sound settings, equipped with a Handler interface and RS232C interface, and is applied to automatic sorting systems to complete fully automatic pipeline testing.
